

ComancheZOOM July 23, 2300Z/7pm EDT:

**Long Distance Comanche Flying**, with avionics expert Ron Keil

Recording started at 7:00 PM, presentation from 7:30 to 8:35, then Q&A discussion

### **Distance Flying Tips**

We are all missing Oshkosh and ComancheTown OSH20 this week: friends, gumbo, lecture sessions, fruity drinks, and airplanes! In honor of all the long distances people fly to get to OSH, on Thursday, Ron Keil presents Long Distance Comanche Flying Tips. With trips of 10.5 NONSTOP hours in a stock Comanche 250, Ron is a past master on engine management, fuel management, and medical (CO, food, and fatigue) Issue management.

Ron's information will make you safer and more comfortable, and your airplane more efficient.

Ron is also an experienced avionics professional who founded the successful Michigan avionics company LaPeer Aviation, and has been an airfield manager. He has presented multiple WINGS seminars on topics that include planning a long XC, and Foreflight with IPAd. He has owned his 1961 PA24-250 since 1986. His wife, Betty, also a pilot, can normally be found at Oshkosh this week with Ron.
