

ComancheZOOM for Thursday, April 27, 2023

Various topics:

This week's Zoom covered various topics.

First, a rundown of the events planned for the Webco Memorial Fly-in in Newton KS. This event, instigated by our ComancheZOOM team, has grown to near-Convention status. It has grown to include invitations from the ICS and other aircraft groups, and to include the entire local community. Bob and Phill were well liked and will be sorely missed.

Next, fuel cell issues with Steve Shepherd

- troubleshooting fuel smell/stains on top of the tank access and below the wing,
- corrosion found on the fuel lines,
- fuel bladder extraction/replacement experiences

Then, many on the Zoom praised the ComancheZOOM team members for the excellent work they have done and continue to do to foster communication and cooperation among the Comanche (and other) aircraft owners and pilots. And also, for the great support provided by the Northeast Comanche Tribe and it's officers to make these Zooms possible.

The evening ended with many remembrances of dealings with Bob and Philip at Webco over the years. They were always happy to help any Comanche driver with a problem, and an excellent source of answers when asked.

Enjoy the Zoom recording for this Thursday evening.
