

ComancheZOOM for August 10, 2023

**Topic: Installing
Articulated Seats with a
337 - with Gary Gray**

Join us for an interesting presentation involving 337 approved modifications to a 1964 Comanche 250. We had a preview of this topic back in June. Gary will go through the process from the starting idea, finding the seats to use, making the needed modifications to the Comanche 250, and most importantly, getting the paperwork right, including a 337 for the work.

Gary does an excellent job, both in the actual planning and work, and in presenting the process in a clear fashion. He swapped out all the seats in his 250, replacing them with four high-adjustable seats from other Piper products. He also improved the equipment in the panel and redid the interior. After the presentation there was a detailed discussion led by a knowledgeable A&P/IA and a DER/DAR about the paperwork required for a 337 form, and the differences between a 337, a field approval, and an STC.
