

August 4, 2022, ComancheZOOM

**Topic: Comanche Workbook – deep dive, Part 2**  
with Mike Neuman

This ComancheZOOM is Part 2 of Mike Neuman's presentation on his Comanche Workbook training tool. It is intended to be used by instructors and students when training or transitioning to Comanches. The workbook is patterned on the very successful Cirrus training program which has made a tremendous improvement in their safety record.

Tonight, Mike covers the Normal Procedures section, start up, takeoff, cruise, and landing, with various subsections of each.

Attendees were asked to fill out a copy of the Workbook using information from their own POH, and then to join in the discussion. The example displayed was for a Twin Comanche, with comments as each item related to singles.

The Workbook PDF files are at:

You can view the recording of Part 1 at:

- <http://meetings.northeastcomanche.org/zoom/2022-07-07/video.mp4>

We will continue with this presentation as Part 3 where we left off, and also address the many questions and comments from the two previous Zooms.

Pete Morse for the ComancheZOOM team
