

ComancheZOOM for July 20, 2023

Topic: Spot Landing skill set and ComancheTown update

Main topic: a discussion lead by Robert Klein, CFI and Zoom support extraordinaire, on Spot Landings. This is a skill you should not need to stop and think about when joining at the aerial traffic jamb that AirVenture arrivals can become. Robert lead a team of fellow Comanche instructors on the important details of hitting the spot on the runway, plus other tips on the arrival.

Several Comanche pilots and instructors added their own viewpoints on this important phase of flight. All stressed the concept of being on target with power setting, airspeed, and pitch – flying like a professional pilot, not just getting the aircraft on the ground.

Pete morse shared an AOPA Pilot Tips which encouraged pilots to practice spot landings whenever you fly. You never know when you may need that skill.
