Title: **Open Mic - Project Updates**

This Thursday's ComancheZOOM was a continuation of the earlier open mic discussion of various programs and projects underway for Comanches. We had asked anyone with a topic they want to bring up to use the registration form and put the request in the comment field.

After the opening general discussion, CJ asked Mathew Smith to walk us through the vast collection of Comanche materials stored in the [docs.NortheastComanche.org](https://docs.northeastcomanche.org) document library. He gave us an extensive tour, showing us quick glimpses of service manuals, parts lists, user handbooks, 337 documents, and many other interesting items for all Comanche models. He also talked about his need for additional materials, particularly for the twin Comanches, and his plans to expand the 337 document list. This discussion took the better part of an hour.

A second topic, brought by Miller Ensile, began a discussion of finances to support the ongoing projects, in particular the work to end or remove the onerous Tail Horn AD. This work was near completion by Hans Neubert, DER extraordinaire, before his recent passing. CJ Stumpf reported that another DER is picking up the process, but that final arrangements have not yet been made. Several means of raising funds were brought forward, ranging from membership dues to specific project donation requests. This discussion was held over for later work.

A number of other topics had been submitted but time ran out. They will be addressed in a future ComancheZOOM.
