

ComancheZOOM for October 29

“1000-Hr Landing Gear AD Inspection” with Hans Neubert, DER

This discussion of the reasons for the AD and what to look for in particular went on for almost two hours! Emphasis was placed on:

- The problems that lead to the gear inspection AD in the first place.
- How the AD is satisfied.
- What other steps are important for safe operation of the gear.
- How to find/talk to your A&P about these procedures.
- Plus other tricks of the trade as found on Hans's CD.

The specific “how to” details are shown and explained in the CD “1000 Hour Landing Gear AD Inspection” produced by George Mahurin and Hans Neubert. Hans is offering the CD at cost (\$20 vs \$40 on the ICS website, both plus shipping and handling). Click on this [/NE_1kHr_OrderForm](#) link for information and to get your copy.

Stay tuned for a future ComancheZOOM with Hans and Matt Kurke when they dive into the “how to” part of doing the AD inspection.

As always, this ComancheZOOM was recorded for future reference, and for those who could not attend at the time. To view/listen to the recording click on a link below.
