

ComancheZOOM for Thursday, September 28, 2023

**Topic: “State of the Comanche World” – Part 2**

This ComancheZOOM is the second of two evenings to cover various topics as an update to projects and events to date.

Planned topics for the two Zooms include:

1. Saving airports (5 airports now involved)
2. Parts project (update on 4 projects)
3. Group buys (4 in the works)
4. Resource lists (to be published, need more names)
5. Tool loan program
6. Comanche Docs online project
7. Reno recap (CJ's personal observations)
8. Northeast Comanche Tribe annual meeting Sept 30

The Zoom begins with a brief review of the carbon monoxide detector to be offered once again as a group buy. It then moved on to the Parts project, detailing a number of developments in this area.

There was an extended discussion of the various replacement parts being created, including the approval process and documentation required for these parts and repair processes.

Once again the Zoom ended at that point due to the hour, with plans to cover the final Reno air races in another ComancheZOOM.
