

ComancheZOOM September 2, 2300Z / 7pm EDT

TOPICS:

- 1) Comanche Parts: prioritize summary list**
- 2) Landing Height altimeter installations**

In the previous ComancheZOOM session we made a list of needed Comanche parts that are in short supply. Tonight's plan is to prioritize that list of about 19 items as part 2 of the series.

We will also go over various approaches to installing the group-buy Laser Altimeter in a Comanche. Pilots provided example photos from two of the more than 50 installations currently being carried out. One is in the belly of a PA30 Twin, the other is in the lower rear wing root fairing of a PA24.
