

ComancheZOOM for Thursday, Apr 30, 2026

Topic: Flying with Pets and Children – part 1

Note: this Zoom is approved for FAA Wings credit. Register below.

Tonight's ComancheZOOM features two top senior medical professionals on a topic that, sooner or later, becomes close to home for every pilot.

- Dr. Rosemarie Williams, DVM & former Tufts University professor of comparative neuropathology, cat lover.
- Dr. Tom Wasser, Senior FAA AME (for over 50 years!) & former F-16 Flight Surgeon, dog lover.

The reality is that both are animal advocates who adore all animals. This presentation, an updated version of the 2023 Flying with Pets, includes emphasis on flying critters safely with lower stress, with a special section on CO toxicity and the vulnerabilities of children and animals in general, and in combination with altitude.

Part 2 will go on to cover flying with children and with medically challenged passengers. Join us for a fun and lifesaving discussion. Bring your questions and experiences. We can learn from each other!

--CJ Stumpf
