

ComancheZOOM for Thursday, Dec 11, 2025

**Topic: 10 Tips for Comanche owners – revisited**

a repeat of the 2020 top 10 tips for new Comanche owners, and reminders for us not-so-new ones.

The Zoom opens with a brief discussion of the two main causes of Comanche accidents: fuel mismanagement and gear collapse. Examples of each were brought up, with preventive actions mentioned.

This was followed by a lengthy discussion of Comanche speed control, particularly when on approach and landing.

Then a PowerPoint of our collection of 10 tips was shown, with the intent to make your flying, and ownership, safer and more enjoyable. The original presentation of 10 tips has been expanded to 17. We ran out of time at #7 and will continue with the rest in next week's Zoom. The full list was shown as a preview.
