Title: **A Day in the Shop with JD**
with JD Kuti of Pinnacle Aviation Engines

- from start to finish, what takes place when an engine enters the shop for an overhaul.

This was the fourth presentation in a series of four on engines. JD Kuti walks us through the shop as an engine first enters and takes us through each step of the overhaul process to the end. In his years as owner of Pinnacle Engines, he has seen many strange and unusual issues. Listen as he shares his stories of some of the strange things found during teardowns. His presentation will benefit both aircraft owners and mechanics.

JD Kuti has 15 years of experience in piston aircraft engines. He is the owner of Pinnacle Aircraft Engines, a Part 145 Repair Station, and loves to share stories of the various findings discovered during engine inspection.

This is another in a series earning WINGS credit. Pilots were directed from the FAA WINGS site to Wings.NortheastComanche.org to fill out our simple form. All registrants received a reminder email Thursday afternoon before the start of the webinar containing a link to the Zoom. Participants had to remember to rename themselves to match their registration so we could credit them for attendance.
