

ComancheZOOM for Thursday, May 28, 2026

**Topic: Seatbelt safety revisited.**

We are in the flying season with many people getting their planes out of the hangar and ready for the cross countries this summer. Do not forget your seat belts.

Dr. Rosemarie Williams will revisit the webinar describing seat belt related injuries, both with and without shoulder harnesses, as a review and for the benefit of our new attendees.

Paula Demi of Alpha Aviation, the distributor of American Safety (AmSafe) harness systems, will be speaking about "care and feeding of the webbing and hardware"; i.e. how to tell when it is time to change the webbing (webbing service life),, how to clean your safety belts, the value of the shoulder harness, and harness installation in various Comanche models. The information from Paula is attached to this email.

There was extensive discussion on the various seat belt systems available. Paula commented on the ones asked about with no bias apparent. David Schober answered questions related to the installation process.

Wings credit was approved. Register at [Wings.NortheastComanche.Org](http://Wings.NortheastComanche.Org). A second Zoom related in more depth to installation and repair is planned.
