

ComancheZOOM for Thursday, September 4, 2025

Topic: Collisions – Midair and Near Misses

This discussion reviews the hazards leading to midair collisions and near midair collisions (NMAC).

The information was summarized through hours of research of the FAR/AIM and other FAA publications.

Emphasis was on the basic problem areas where improvements in pilot education, operating practices, procedures, and improved scanning techniques are needed to reduce midair conflicts. - Rosemarie Williams

Dan Gryder from Probable Cause will lead off.

Time was allowed for attendees to relate any near misses they may have experienced or witnessed. There were many comments in the Chat file.
