**Title: -- ForeFlight Features and Levels --**  
w/ Jason Staloff

Jason Staloff of ForeFlight returns and ready dives into the many features available at the different levels of Foreflight.

What ForeFlight features go with what subscription levels and what do they do? Jason presents a ForeFlight feature review at the different levels, going back and forth between the documentation and the application.

As Jason put it: "it's easier to select the right plan when you're familiar with the features!"

There was a good number of questions passed on through the Chat window, and Jason did his best to answer them. He will return again at a future Zoom to deal with the ones we did not get to, or that he needed to get more information before answering.

There was a good deal of discussion about the ForeFlight weather information and sources. Jason promised to bring the ideas brought up back to the shop. He reminded us that the ForeFlight programmers are also pilots – they both build it and use it.
